Title: Software Developer II

Location: Northridge, Ca

Department: Information Technology

Description: The Software Developer II will be responsible for developing and implementing windows, web, and data integration applications as well as supporting existing systems based on business requirements. Will collaborate with Software and Systems Manager and other team members and departments on projects with cutting-edge technologies and solving challenging problems in data engineering and operations-oriented software development.

Responsibilities:

- Able to work independently and within a team to deliver end-to-end custom end-user application and data integration solutions for moderate and complex projects.
- Support with in-house applications development, SSRS reporting, and building data integration interfaces.
- Develop, test, implement and maintain windows and web applications using the .NET framework and Microsoft technologies
- Perform coding, debugging, testing, and troubleshooting throughout the application development process utilizing front-end and back-end development tools.
- Prepare technical design documents using enterprise standard documentation tools
- Execute test plans and scenarios for applications testing
- Document new development, procedures or test plans, as needed
- Communicate professionally to internal and external business partners, which includes the ability to listen, speak, and write effectively and ethically.
- Self-starter; able to work with a high degree of autonomy
- Analyze user needs and software requirements to determine the feasibility of design within time and cost constraints.
- Identify and troubleshoot errors by reading application and server logs, debugging, and testing
- Build efficient and reusable front-end systems
- Identify and address performance bottlenecks
- Expected to learn and apply standards and best practices within the discipline of Software Development with the guidance of management.
- Exceptional accountability, follow-up, and attention to detail.
- Follows Standard Operating Procedures (SOPs) and Current Good Manufacturing Practices (cGMPs) and external regulations regarding the products and procedures.
- Adhere to OSHA guidelines and other governmental and company standards
- Ability to understand and use correctly the Blood Establishment Computer Software (BECS)
- Manage Special Projects, as assigned.

Supervisory Responsibilities This position has no direct supervisory responsibility.

Requirements:

- This position requires good familiarity with Microsoft technologies.
- User interface and back-end development
- Experience in .NET framework 4.5 or higher, SQL Server 2008/2016, C#, VB.NET, web services, APIs, and HTML5, is highly desirable.
- Follows standards and best coding practices.
- Ability to quickly learn new software programs as needed.
- Have taken a variety of courses in computer science and engineering or a related field
- Discretion in handling confidential and sensitive matters
- Curiosity and a desire to learn new things
- Strong interpersonal skills
- Analytical and problem-solving skills
- Effective written and verbal communication skills
- Ability to work independently and within a team
- Ability to work in a fast-paced environment

Education, Experience and Licensure

- High school diploma or comparable education, required.
- Bachelor's Degree in Computer Science or equivalent experience.
- 5+ years full-stack application development
- 5+ years of Software Development experience
- 5+ years of work experience in the following technologies: NET framework 4.5 or higher, VB.NET, C#, HTML5, SQL -Server 2008/2017 and SSRS, Visual Studio 2015 or higher, IIS 7.0 or higher
- 5+ year of experience with T-SQL and PL/SQL
- 5+ years with CSS3, JavaScript, REST API, PHP is a plus
- 5+ year of experience with MS SQL, Oracle, 4D is a plus
